

Form A – Micro-Generation Notice

If you have questions on how to fill in the form, refer to the [micro-generation notice submission guideline](#) posted on the AUC website under “Micro-generation” for detailed information.

Some small micro-generation projects may require utility engineering consultation.

Large micro-generation (greater than or equal to 150 kilowatts) project requirements:

- Utility engineering consultation required.
- Stamped single-line diagram required.

Check the appropriate boxes to identify your micro-generation project:

Does the project meet the micro-generation generating requirements? Yes No

Are you existing micro-generation customer? Yes No

If yes, please state:

Existing capacity (in kilowatts): _____

Project number (if available): _____

Are you increasing or decreasing the generation capacity? Yes No

If yes, please state:

Change in generation capacity (increase or decrease) in kilowatts: _____

Is this notice being used for aggregating multiple sites? Yes No

Is the proposed Microgen 150kW or larger? Yes No

1. Customer identification			
Name:		Company name (if applicable):	
Address:		City:	
Province:	Postal code:	Phone:	Fax:
Email address:		Preferred method of contact:	Email Mail Fax
Other Interested Parties:			

<p>Micro-generation generating unit total nameplate alternating current capacity in kilowatts:</p> <p>Site 1: _____</p>	<p>Customer annual alternating current energy consumption in kilowatt-hours (information should be requested from retailer for 12 months).</p> <p>Site 1: _____</p> <p>Site 2: _____</p> <p>Site 3: _____</p> <p>Site 4: _____</p>
-------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Voltage level of connection:	Phase: Single Three
------------------------------	-----------------------------------

4. Supporting Documents Required:

Submit the following supporting documentation:

- a) electrical single-line diagram of the micro-generation system
- b) site plan or pictures to illustrate the micro-generation unit location
- c) equipment specification from manufacturer
- d) applicable certification document(s)
- e) electrical permit
- f) electrical inspection report (to be submitted after installation of the micro-generator(s) is completed and inspected)
- g) documentation verifying that the generator meets the less than or equal to 418 kilograms per megawatt hour limit specified in the Micro-Generation Regulation (combined heat and power unit)
- h) other supporting document(s), if any,

Please specify _____

Have you met all applicable municipal and zoning requirements, including noise rules and by-laws?	Yes	No
Please specify _____		

Have you completed the participant involvement program stated in AUC Rule 007? *	Yes	No
Please specify _____		

Have you met the requirements stated in AUC Rule 012 Noise Control? *	Yes	No
Please specify _____		

Have you met all applicable environmental requirements? *	Yes	No
Please specify _____		

Are you aware of any understanding objections from any person regarding your project? *		Yes	No
Please specify _____			
Requested in-service date (YYYY-MM-DD) for connection:			
Micro-generation generating unit owner signature:		Submission Date:	
Consultant signature (if signing on behalf of the customer):		Submission Date:	
If signing on behalf of the customer, the utility may require a third Party authorization to be signed by the customer.			
*the micro-generation customer must ensure that the criteria for an example form filing an application with the Commission as stated in Section 2 of Rule 007 are satisfied. To receive electricity generation credits, the micro-generation customer must notify its retailer or regulated rate provider once the notice is accepted by the owner or in the event that the Commission decides that a disputed unit is a micro-generation generating unit.			
5. Electric distribution system wires owner use only.			
Owner's notice reference number:		Alberta Electric System Operator Asset ID (if any):	
Date the complete application was received (YYYY-MM-DD):		Interconnection Line:	
Accepted : Yes No Reason(s) for dispute:			
Interconnection Agreement Signed? Yes No Not applicable			
Meter Type: Interval Cumulative			
Meter Installed Date (YYYY-MM-DD):			
Remarks:
